ABOUT ME

Computer Engineering graduate and full-stack developer (MERN/PERN) transitioning into AI automation, with hands-on workflow automation using n8n and a Python (FastAPI) microservice built for AI-based scoring. Comfortable across the stack, from React front ends to Node/Express back ends and relational databases, and now extending that foundation into applied AI.

SKILLS

- **Programming & Frontend:** Python, JavaScript, HTML, CSS, React.js
- **Databases:** PostgreSQL, MySQL, MongoDB
- **AI & Generative AI:** RAG, Prompt Engineering
- **Automation, Design & Tools:** n8n, UI/UX Design, Git, GitHub
- **Soft Skills:** Communication, Time Management, Problem Solving & Critical Thinking

EDUCATION

B.E. Computer Engineering — Ahmedabad Institute of Technology *2022 – 2026*

CGPA: 7.49

WORK EXPERIENCE

React.js Developer Intern — Krupa Info Services *November 2025 – April 2026*

- Developed React.js-based web applications and responsive UI layouts for client projects.
- Implemented RESTful APIs using Node.js and Express.js as part of an offline, on-site internship.

Web Development Intern — Tamizhan Skills *June 2025 – July 2025*

- Completed a one-month internship covering web development fundamentals, building responsive web pages using HTML, CSS, and JavaScript.

PROJECTS

Job Portal Web Application — PERN Stack + Python (FastAPI)

- Built a full-stack job portal with React.js, Node.js, Express.js, and PostgreSQL, supporting role-based access for job seekers, recruiters, and admins.
- Implemented job posting, applications, resume uploads, and real-time messaging between candidates and recruiters.
- Integrated a subscription/payment flow and a separate Python (FastAPI) microservice for AI-based mock interviews and aptitude test scoring.

Online Pharmacy & Lab Test Booking Platform — MERN Stack

- Developed a healthcare platform for medicine browsing and lab test booking with categorized product catalogs and test packages.
- Built workflows for technician assignment, home sample collection tracking, result entry, and digital lab report access.
- Implemented secure admin management for inventory, technicians, and test catalog data.

Surface Defect Detection for Ceramic Tiles — Computer Vision

- Built an AI-based surface defect detection system to support quality control in ceramic tile manufacturing units in Morbi.
- Applied computer vision techniques to identify and classify surface defects from tile images.

CERTIFICATIONS

Intel® AI for Manufacturing Certificate Course — Intel India & GTU *Feb 2025 – July 2025*

- Hands-on training in AI, computer vision, and predictive maintenance for manufacturing applications.

Code Unnati Program — Edunet Foundation *Sep 2024 – Apr 2025*

- Covered emerging technologies including Machine Learning, IoT, and Deep Learning.
